DISCUSSION:

The TSA-George Bush International Airport was added to the Federal Agency Hazardous Waste Compliance Docket under the reporting mechanism Resource Conservation Recovery Act (RCRA) section 3010 in October 2010. The facility was listed on the docket due to the RCRA reporting mechanism 3010 as a Large Quantity Generator (LQG) associated with the disposal of hazardous waste. In accordance to CERCLA section 120(d) the facility must provide information necessary to assess the threat pose to human health to the Environmental Protection Agency.

Based on the information submitted, hazardous materials/waste collected from travelers are properly packed into label containers and stored in a flammable storage cabinet before shipped to an approved permitted disposal facility.

Therefore, a decision of "No Further Remedial Action Planned" (NFRAP) under Superfund will be entered in CERCLIS, and the site will be referred to the TSA. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the facility unless new information warranting further consideration or conditions not previously known regarding the site are disclosed.

Based upon currently available information, this site fails to meet the minimum criteria required to be included, or proposed, at this time on the NPL by the EPA. The NPL is EPA's list of sites that are priorities for further investigation and, if necessary, response action under CERCLA, 42 USC 960001 et seq. This decision does not preclude any further safety action at the facility by the TSA.

SEGREGATION OF VOLUNTARILY ABANDONED PROPERTY

LABEL	TITLE	DEFINITIONS	EXAMPLES	CONTAINERS	MANAGEMENT
	Explosives (Hazard Class 1)	Substances and articles that are capable of producing a sudden effect by gas, heat, light, sound, or pressure, or by a combination of these effects.	1. Ammunition, cartridges and shells 2. Bombs 3. Explosives 4. Detonators	See above	Explosives are subject to special handling and must be segregated from all other property.
	Flammable Gases (Hazard Class 2.1)	Compressed gases that are flammable under standard conditions of temperature and pressure.	1. Gas cylinders 2. Flammable aerosols 3. Flammable liquids in aerosol form	See above	Flammable gases are subject to special handling and must be segregated from all other property.
	Flammable Liquids (Hazard Class 2.2)	Liquids that are flammable under standard conditions of temperature and pressure.	1. Gasoline 2. Alcohol 3. Flammable liquids in aerosol form	See above	Flammable liquids are subject to special handling and must be segregated from all other property.
	Flammable Solids (Hazard Class 2.3)	Solids that are flammable under standard conditions of temperature and pressure.	1. Gunpowder 2. Flammable solids in aerosol form	See above	Flammable solids are subject to special handling and must be segregated from all other property.
	Flammable Aerosols (Hazard Class 2.4)	Aerosols that are flammable under standard conditions of temperature and pressure.	1. Flammable aerosols 2. Flammable liquids in aerosol form	See above	Flammable aerosols are subject to special handling and must be segregated from all other property.
	Flammable Gases (Hazard Class 2.1)	Compressed gases that are flammable under standard conditions of temperature and pressure.	1. Gas cylinders 2. Flammable aerosols 3. Flammable liquids in aerosol form	See above	Flammable gases are subject to special handling and must be segregated from all other property.
	Flammable Liquids (Hazard Class 2.2)	Liquids that are flammable under standard conditions of temperature and pressure.	1. Gasoline 2. Alcohol 3. Flammable liquids in aerosol form	See above	Flammable liquids are subject to special handling and must be segregated from all other property.
	Flammable Solids (Hazard Class 2.3)	Solids that are flammable under standard conditions of temperature and pressure.	1. Gunpowder 2. Flammable solids in aerosol form	See above	Flammable solids are subject to special handling and must be segregated from all other property.
	Flammable Aerosols (Hazard Class 2.4)	Aerosols that are flammable under standard conditions of temperature and pressure.	1. Flammable aerosols 2. Flammable liquids in aerosol form	See above	Flammable aerosols are subject to special handling and must be segregated from all other property.

CONTACTS

Pickups and General Questions:
TSA Solutions@tsa.gov

Emergency Hotline:
(202) 757-2517

Non-Emergency Hotline:
(731) 313-4713

SPILL RELEASE PROCEDURES

1. Keep passengers and TSA personnel away from release.
2. Avoid contact with substance.
3. Limit spread of spilled material (e.g., shut off conveyor belt).
4. Notify the TSA Screening Manager.
5. Contact the Airport Emergency Response.
6. Call Emergency Hotline within 4 hours of release.
7. Complete Incident Report within 24 hours of release.
